

# Roy (Yuanxi) Cheng

Laguna Niguel, CA | (949) 378-0596 | [roycheng27@ucla.edu](mailto:roycheng27@ucla.edu) | [linkedin.com/in/ycheng05](https://www.linkedin.com/in/ycheng05)

## EDUCATION

### University of California, Los Angeles (UCLA)

Sep 2023 – Mar 2027

*Bachelor of Science in Statistics and Data Science, Minor in Data Science Engineering*

*GPA: 3.75*

- **Awards & Programs:** Dean's Honor's List, Persolv AI Intensive, BCG Case Comp Semi-finalist
- **Certificates:** Data Science & SQL in Python, EDA in R, Data Manipulation with dplyr, Data Visualization with ggplot2
- **Relevant Coursework:** Machine Learning, Neural Networks & Deep Learning, Data Analysis & Regression, Data Mining, Data Structures & Algorithms, Probability & Statistical Inference, Databases, NLP, Monte Carlo, Optimization

## WORK AND LEADERSHIP EXPERIENCE

### Capital One

McLean, Virginia

*Product Management and Analysis Intern*

*Jun 2026 – Present*

- Analyze corporate-wide people data with SQL and Python, identifying factors tied to successful organizational transitions across business units
- Synthesize findings into a mock HRBP dashboard of key reorg metrics, presenting to SVP to help HRBPs track retention, mobility, and headcount during reorganizations
- Build a FAISS semantic index over O\*NET occupations with BAAI/bge-base-en embeddings, enabling an LLM agent to retrieve top-K DWA candidates and evidence-score them against 1,459 anonymized performance reviews
- Design a two-stage LLM pipeline with a review denoiser (1,300 to 200 tokens) and DWA evidence matcher with verbatim citation validation, producing ranked skills menus to reframe Capital One job qualifications

### Data Science Union

Los Angeles, California

*External Vice President*

*Dec 2025 – Present*

- Directed external strategy across client partnerships, marketing, and professional development, expanding consulting and career opportunities for members
- Managed 3 directors and coordinated executive board priorities, aligning cross-functional execution to deliver quarterly and annual objectives
- Cultivated industry and alumni partnerships, securing client data science projects and expanding career programming across the organization

### Kohl's

Los Angeles, California

*Project Manager and Data Analyst*

*Jun 2025 – Mar 2026*

- Developed and deployed a two-stage XGBoost forecasting system with time-aware validation to prevent leakage, cutting shipment arrival MAE by 83%
- Engineered route, carrier, seasonality, and port congestion features in Vertex AI Workbench, capturing delay patterns that improved transit time predictions
- Aggregated 8.5M+ product-level logistics records into shipment-level training data with SQL and Python, eliminating duplication and leakage-prone fields

### ACTUM Digital

Prague, Czech Republic

*Data Analyst and AI Intern*

*Jun 2025 – Aug 2025*

- Built agentic Python pipelines to filter documents, generate metadata, and embed content into a Milvus vector database for retrieval-augmented workflows
- Created internal AI assistant by designing prompts and integrating an MCP server, co-presenting the live demo to ACTUM executives
- Automated extraction of structured data from 600+ unstructured PDFs with Python, consolidating results into a centralized dataset for client reporting

### Million Dollar Baby

Los Angeles, California

*Data Analysis Consultant*

*Apr 2025 – Jun 2025*

- Analyzed \$10M+ in advertising spend with SQL, surfacing efficiency insights that informed growth strategy and marketing investment decisions
- Presented CAC and RoAS assessments across multiple attribution windows, guiding stakeholder decisions on marketing spend allocation
- Built an Excel dashboard tracking 20+ marketing KPIs, giving brand managers a recurring view of acquisition and return trends

## PROJECTS AND RESEARCH

---

### **Biomedical Tissue Imaging** | *Python, PyTorch, YOLOv8, Pandas, NumPy, Matplotlib, OpenCV*

- Published article evaluating CNN-based instance segmentation architectures with AP metrics, benchmarking cytoplasm boundary precision for biomedical imaging
- Converted 4k+ CytoNuke annotations to COCO format through a custom data pipeline, enabling standardized training across 3 segmentation architectures
- Trained and tuned YOLOv8 instance segmentation models in PyTorch, improving cytoplasm AP50 by 5% over the Cyto-RCNN baseline

### **Adrenaline and Cognitive Fatigue Effects on Athletic Performance** | *R, ggplot2, tidyverse, dplyr*

- Designed 2<sup>3</sup> factorial experiment with 96 participants across 8 conditions, blocking by age and gender to reduce variance
- Conducted three-way ANOVA and Tukey post hoc tests in R, revealing no significant interactions at  $\alpha = 0.05$
- Validated ANOVA assumptions using log transformation and ggplot2 diagnostics, confirming normality and homoscedasticity of residuals

### **COVID Pandemic Effects on Secondary Education** | *Python, Pandas, Tableau, Excel, Matplotlib*

- Cleaned and merged 100k+ student records across multi-level datasets with pandas, enabling accurate longitudinal analysis in Tableau
- Aggregated 4 years of test scores into time series visualizations, revealing a 15% average decline in student performance
- Created an interactive Tableau map linking geographic data to score changes across 50 U.S. states for a public research website

## TECHNICAL SKILLS

---

**Languages:** Python, SQL, R, C++, JavaScript, Java

**Libraries/Frameworks:** LangChain, PyTorch, TensorFlow, scikit-learn, XGBoost, pandas, NumPy, Keras, MLflow, Matplotlib

**Tools & Platforms:** Git, GitHub, Claude Code, AWS, Vertex AI, GCP, BigQuery, Snowflake, Tableau, Jupyter Notebooks
